

PRETTY PAPER SNOWFLAKES

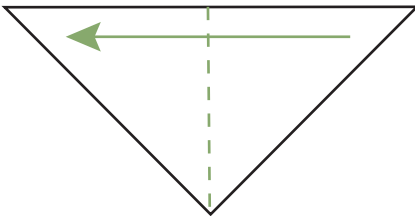

1 Fold one corner up across to form a right triangle.

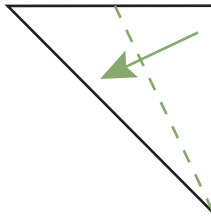

2 Trim excess paper from top (as shown).

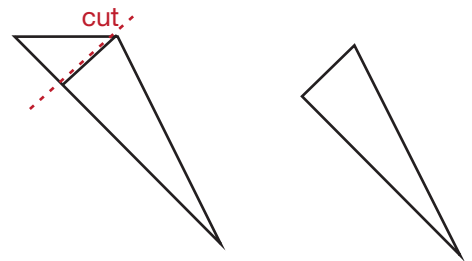

3 Fold the bottom corner up along folded edge.

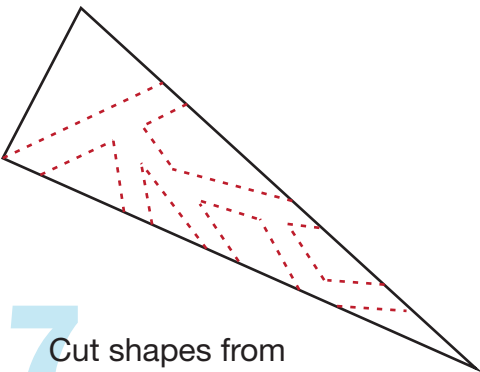

4 Fold the triangle in half with folded edges together.

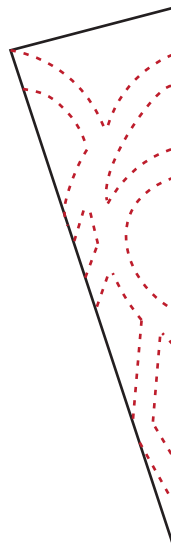

5 Fold the folded edge across to form cone.

6 Trim excess paper from top.

7 Cut shapes from each folded side, cutting all the way from one side to the other ONLY at the top and bottom.

Tips

Thinner paper is easiest to cut. Try tracing paper for a pretty, semi-translucent look!

The paper left when you cut out the shapes forms the lines of the snowflake so experiment by varying thickness and by making the lines continue from one shape to the next.

Every snowflake is different so try new things each time while you discover what you like best.
